

CATALOG OF FINALISTS' PROJECTS

HALLI 2.0

2023

THE #HALLI 2.0 PROJECT IS IMPLEMENTED BY THE NGO «NATIONAL INTEREST
ADVOCACY NETWORK «ANTS» WITH THE FINANCIAL SUPPORT OF NED.

Leadership is not just a willingness to be in the background of future leaders, it is to train new visionaries and practitioners to implement the ideas you believe in! The future belongs to those who will create an environment for the worthy!

Hanna HOPKO,
Chairman of the Board of
NGO «National Interest Advocacy
Network «ANTS»

HALLI 2.0 – Hackathon for Leadership in Local Innovations – an all-Ukrainian incubator for identifying, supporting and implementing innovations at the local level.

The mission of the project: to identify new leaders of civil society and unite them in the network of change-makers in the process of post-war recovery of Ukraine.

The goal: to help local leaders with viable social innovation ideas for their communities to bring them to life.

The first HALLI hackathon was successfully implemented by our team in 2022.

Victoria drone school
Poltava ●●●●●

●●●●● **Project:**

●●●●● **SCHOOL OF DRONES FOR YOUTH**
●●●●● **«VICTORIA DRONE SCHOOL»**

Training the youth of Poltava and IDPs to control drones, which are now widely used in many industries. Drone operator will soon be one of the most in-demand and prestigious professions.

We have an idea to create a youth technohub in Poltava, which will allow young people to learn not only to drive, but also to design, manufacture, program unmanned and robotic devices, compete in sports drone races or freestyle, and also have the opportunity to implement their own mini startups.

●●● **Project:**
●●● **ARBOR OF THE FUTURE**

The goal of the «Arbor of the Future» project is to create an ecological space that will meet the needs of local residents and guests of the village. Our goal: to build a modern arbor using innovative technologies that will contribute to the creation of a comfortable and safe environment for relaxation and communication.

Our aim is to unite the local population and create a united team for positive changes in our village.

●●●● **Project:**
●●●● **RECOVERY AND TRANSFORMATION**
●●●● **CENTER – «RESOURCE»**

The «RESOURCE» recovery and transformation center is aimed at supporting community residents in achieving harmony and psychophysical well-being. The purpose of the project is to spread the principles of a healthy and safe lifestyle, a culture of health, providing the necessary tools and resources for personal development, overcoming stress, injuries, and psychological difficulties.

●●●● **Project:**
SCHOOL OF DIPLOMAT

The idea of the project is to train international specialists for territorial communities who will establish and develop international cooperation in communities, attract grant funds, implement various projects in order to improve the level of socio-economic development of the community and its residents. Target audience of the project is foreign affairs students, school students and employees of territorial communities engaged in international activities. The project is especially relevant nowadays due to the war and reconstruction of Ukraine after the war, as well as Ukraine's acquisition of the status of an official candidate for EU membership, which gives the opportunity of access to various financial instruments of the European Union.

- **Project:**
- **MOBILE EDUCATIONAL HUB**
- **NEW SCHOOL**

The task of our project is to increase student motivation to study and engaging community residents in active interaction and co-creation of new ideas by creating an educational hub.

● **Project:**
●
● **MOBILE SPACE OF SCIENCE**

Our goal is to create a set of «Miniphenomena» experimental stands (developed according to the methodology of Professor Lutz Fiesser of the University of Flensburg (Germany)) for organizing the work of the mobile space of science as a mobile exhibition in the educational institutions of the city. The project budget includes the purchase of tools and materials for manufacturing of 20 stands.

Field of project implementation:
Integration of IDPs

Team:

Power of Podillia

Project:
POWER OF PODILLIA

Carrying out a series of financial, social and legal activities, psychological trainings for women and children whose loved ones are protecting Ukraine at the front, and who moved to the Vynnytsia region as a result of aggression of the Russian Federation. The event is aimed at psychological reset of girls with children and includes gaining knowledge of social opportunities and rights in the new community; financial literacy understanding.

The acquired knowledge will help women and children establish communication both in the family and in society. Increasing of financial literacy will help in achieving financial stability, independence and success in various areas of life (increasing stress resistance; planning a protected future; legal protection of one's own interests; managing one's own budget; entrepreneurship).

PRO ●●●

●●● **Project:**
●●● **PROmap**

An interactive map with all companies and organizations, that offer services, goods or help to children. It is very difficult for parents, especially IDPs, to find a good local doctor or a children's clothing store. A lot of small organizations are not present online or in social networks. With volunteers help, we will create a database of all organizations and activities that provide services to mothers and children, we will group them by category (for example, private kindergartens, assistance points, sports clubs, etc.) and put them on the map. This online tool should be easy to use and equally accessible on devices with different screen sizes. The functionality includes the ability to rate and leave feedback. Service providers will have the opportunity to add and change information about them.

MARA

• **Project:**
• **MARA: GUIDE IN COPING**
• **WITH LOSS**

Our project is an informational, psycho-educational campaign on coping with loss. As part of the project, we publish educational materials about grief, self- and loved ones supporting in this process.

We also conduct educational events. We move away from exclusively point counseling of those experiencing loss and create self-charging community. Based on evidence-based international methods and unique Ukrainian experience, we will become a guide in coping with loss.

Team: ●●●

Meeting point – Svydivok ●●●

Project:

MEETING POINT – SVYDIVOK

Creation of the «Meeting Point-Svydivok» park, which will have all the conditions for leisure, rest and communication of villagers and their guests. Park will function as an open public space for village residents (2,800 inhabitants), tourists and guests (about 10,000).

Project:

SHOES FOR BEING

Team:

We are Kharkiv residents

The project is a shoe production training center for people who suffered from military aggression in Kharkiv and Kharkiv region. Thanks to the implementation of the project Shoes for being, the affected people will have the opportunity to get professional skills that will allow them to get a new profession in the future and adapt to new living conditions. And the shoes produced by our students will be given to IDP centers and charity houses. Later, the city of Kharkiv will receive a social enterprise.

●●● **Project:**

●●● **BIBLIOHUB – A MODERN SPACE OF
NEW OPPORTUNITIES**

The team's project involves expanding the circle of communication of children, whose families are in difficult life circumstances, as well as facilitating the adaptation of IDPs in new conditions by providing the opportunity to use multimedia and gaming equipment free of charge, receive help and support during online learning, join classes in groups, and participate in competitions, quizzes, literary festivals. We want to create a territory of like-minded people and a space for inspiration.

Culture

**Pokrovsk community
Donetsk region**

Mohyliv community
Dnipropetrovsk region

Field of project implementation:
Energetics

Team:

BEREGYNI

Project:
**HOT WATER FOR ELDERLY
PEOPLE**

The idea is to become partially independent from fluctuations in energy prices, independent from the consequences of war; to start increasing the level of energy efficiency, with thoughts about the environment; become more economical in the use of budget funds thanks to the started implementation of green technologies in the lives of ordinary people.

Therefore, we plan to install a hybrid boiler (300 l) with solar photocells on the premises of the Mogiliv geriatric boarding house, where there are 165 wards - elderly people and people with disabilities, who will be able to take a hot shower in sufficient quantity, regardless of external circumstances.

●●● **Project:**

●●● **VELYKOPYSARIV TOURIST REGION.
RENAISSANCE**

Our project «Velykopysariv tourist region. Renaissance» aims to revive tourism as one of the areas of existence of our community.

We want to create adaptive tourist routes for our residents and neighboring communities. (The routes that existed before the full-scale invasion are dangerous today). The ultimate goal is creating a tourist center and maximum involvement of the population in an active lifestyle and expansion of the tourist sphere in the online format.
