

Social innovation projects

HALLI 2022-2024

HALLI in numbers:

- 333 applications with ideas for implementing social changes in communities were received.
- 120 teams that went through the process of increasing institutional and organizational capacity in the project.
- More than 300 people who have increased their knowledge on all cycles of project interaction, including blocks: gender equality, inclusion, mental recovery, digitalization, project management, communication, social entrepreneurship, English for public activists, attracting partners and others.
- 27 supported and implemented projects with financing from 100 to 5000 US dollars.
- 25 communities where projects were implemented.
- 13 areas covered by the ideas of the project finalists and winners.
- More than 10 areas of project implementation.

PROJECT
BiblioHub

Donetsk region, Pokrovsk city

Project field: non-formal education

Project challenge: providing access to non-formal education and leisure for children in the front-line community

The BIBLIOhub team provides children and young people with free use of multimedia and game equipment, provides support during distance learning, engages children to participate in clubs and competitions. The project is implemented in a front-line community. Despite the difficult conditions in the region, the team continues to work and expand the circle of communication of children from families in difficult life circumstances. Due to the deteriorating situation in the community, the library remains almost the only center of non-formal education in the city of Pokrovsk. During the implementation of the project, the library named after Olena Pchilka was hit by rocket attacks twice. The front door and windows were damaged. Thanks to the joint efforts of the community, volunteers and the team, the consequences were overcome. The team continues to work for the cultural and intellectual development and support of children.

PROJECT To Be

Zaporizhzhya region, Zaporizhzhya city

Project field: psychological support

Project challenge: providing psychological support for people grieving in the face of a full-scale invasion

The vision of the future by the "To Be" team is Ukraine, in which people are supported and understood in grief, with sensitive attitude to the experience of living with loss.

The "To Be" project began in the frontline region. The idea of the project is to help and support those who are experiencing grief. The team members themselves provide psychological support to people who are experiencing loss, and also they have conducted a number of trainings about support of people who have lost loved ones for representatives of auxiliary professions - social workers, psychologists, volunteers. As part of the project, the "Self-Care Diary" was created and presented - a tool that helps people who have experienced the loss of loved ones to get through this difficult period more easily. Team specialists of "To Be" project actively work and share their own developments and knowledge in the micro blog.

During participation in the HALLI 2.0 project the team founded its NGO "To Be", continuing to systematically implement change-making initiatives.

PROJECT

Power of Podillya

Vinnytsia region, Vinnytsia city

Project field: mental support and social assistance

Project challenge: support and psychological reset of internally displaced persons and women with children from military families

SITE

The "Power of Podillya" project is aimed at supporting and psychologically resetting women and children from military families.

Within the framework of the project, various programs were implemented, increasing financial and legal literacy, trainings and master classes. Special attention was paid to the psychological support of women and children whose loved ones are defending Ukraine at the front, and forcibly displaced persons.

The "Power of Podillya" team creates comfortable conditions for women's participation in project events, providing professional care for children during their studies. As part of the project, a roadmap for financial well-being was created, which is posted on the team's website.

The team continues to provide financial and legal advice, helps with starting an entrepreneurial activity and writing business projects, provides psychological assistance.

PROJECT

School of Diplomat

Volyn region, Lutsk city

Project field: education

Project challenge: European integration of Ukraine

The goal of the “School of Diplomat” project is to promote the successful European integration of Ukraine by providing in-depth knowledge on European integration to public servants and training of human resources at the level of territorial communities to ensure the process of Ukraine's accession to the EU.

The course developed by the team is aimed at teaching community representatives to establish and develop international cooperation, attract grant funds and implement various projects of international cooperation to improve the quality of life in their communities and bring it closer to EU standards.

From March 2024, the “School of Diplomat” course for students of secondary schools and students of higher education institutions has been started. As part of this initiative, participants learn the specifics of diplomatic protocol and etiquette during meetings with experts and diplomats. Training is provided free of charge.

PROJECT Social country

Kyiv region, Kyiv city / all of Ukraine

Project field: economy

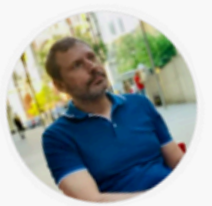

Project challenge: effective resource attraction
and support of social projects

Соціальна команда

Ми щоденно працюємо, аби підтримати та збагатити громадянське суспільство України. Наша діяльність - це не просто допомога, це рух до інновацій, розвиток громад і втілення справедливості на принципах європейських цінностей. Ми переконані: кожна громада може стати активною та сильною, і саме ця віра об'єднує нас у спільному прагненні до великої мети. Підтримуючи кожного активіста, кожену ініціативу, ми робимо впевнені кроки до світу, який ми разом створюємо - світу солідарності, добробуту та взаємоповаги.

Натхненна та вмотивована професіоналка, яка займається розвитком та впровадженням соціальних ініціатив. Значний досвід спрямований на соціальне підприємництво відіграє ключову роль у формуванні стратегій, які сприяють соціальному розвитку

social country

The "Social Country" project is a platform for supporting and attracting resources for social projects. The innovation of the project lies in the fact that the platform provides participants with much more opportunities than classic crowdfunding: the team provides project support, provides a media platform for their presentation, helps in writing project applications and finding additional funding.

"Social Country" also provides evaluation and verifies real interest in ideas directly from project beneficiaries.

PROJECT REMNEMO

Kharkiv region, Kharkiv city

Project field: education

Project challenge: effective provision of personalized English language training for users at different levels of knowledge

The goal of the "REM NEMO" project is to make learning new words easy with a personalized, convenient mobile application for vocabulary updating and learning. The REM NEMO application allows users to create individual tasks and track their progress. Users can create specialized sets of vocabulary cards to achieve specific learning goals. Personalized memorization methods and cards are developed with the help of artificial intelligence.

The team developed the website and filled it with data for testing.

The project is at the stage of implementation.

PROJECT

Mobile space of science

Dnipropetrovsk region, Kryvyi Rih city

Project field: education

Project challenge: ensuring access to quality school education during a full-scale invasion

Despite the full-scale invasion and difficult conditions in the region, the teachers of Kryvyi Rih Gymnasium No. 51 not only continue their professional activities, but also look for additional tools to improve the quality of education. The "Mobile space of science" project is aimed at popularizing STEAM - education methods, developing logical thinking and the ability to solve problems, and making up for educational losses by additional motivation of students.

"Mobile space of science" is a mobile exhibition of experimental stands that illustrate physical and chemical phenomena of the surrounding world and helps students learn about these phenomena and study them in an interactive way. The stands are mobile and can be used in many schools of the city.

PROJECT

Mobile educational hub "New School"

Volyn Region, Zabolotiv territorial community,
Zalysy village

Project field: education

Project challenge: arrangement of an informal
space for young people in a community with a
large concentration of forcibly displaced persons

The project "Mobile educational hub "New School" is aimed at arranging an informal space for the youth of the village.

During the participation in the HALLI 2.0 hackathon, the team developed a successful strategy for the implementation of the project, which made it possible to establish cooperation with the local authorities and receive funds for the repair and equipment of a space where the youth and children of the community can usefully spend their leisure time, gaining additional knowledge.

On the basis of the hub, activities are held not only for children and youth, but also for educators from all over Ukraine.

The team founded its own NGO "Center for innovation and community action "Krok" and continues its active work aimed at the development of education, culture and creativity in the community.

PROJECT
Open Space

Poltava region, Novoseliv united territorial community

Project field: ecology

Project challenge: uniting the host community by creating conditions for self-realization

The “Co-creation center “Open Space” project is a public space in the cultural center of the Novoseliv territorial community.

The project is aimed at uniting the community, creating conditions for self-realization and strengthening the community's resilience to the challenges caused by the war.

At the moment, the team is arranging the space with the necessary furniture and equipment in order to start trainings, workshops, informal meetings for participants of different age categories as soon as possible.

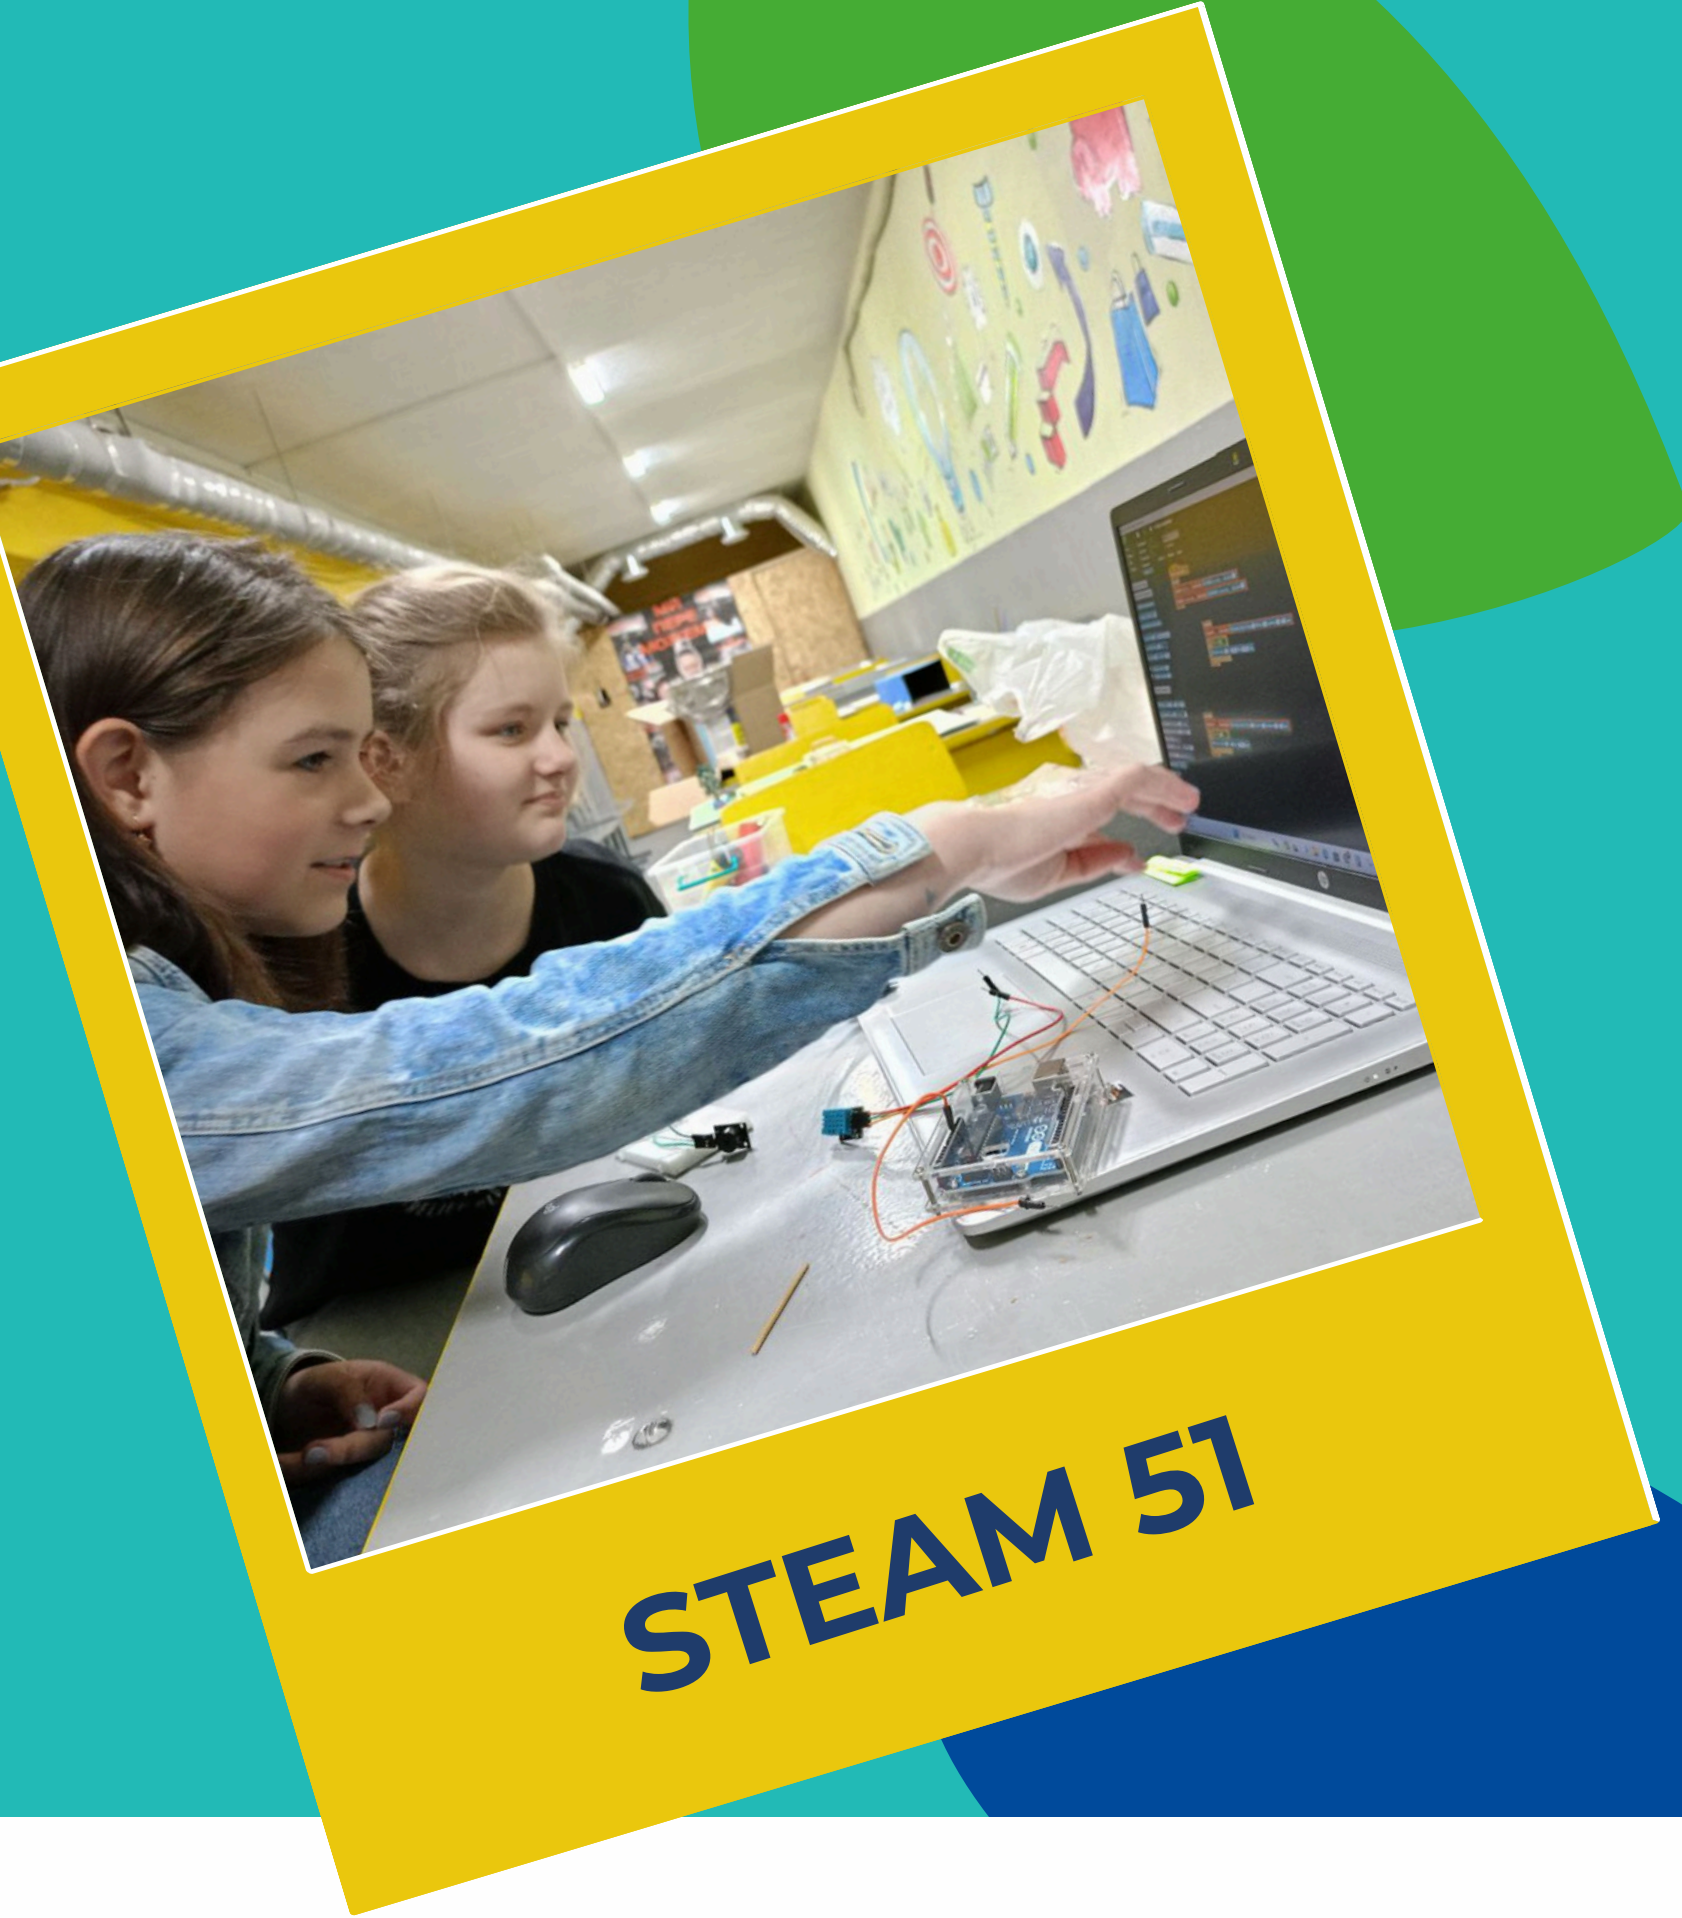

PROJECT **STEAM 51**

Dnipropetrovsk region, Kryvyi Rih city

Project field: education

Project challenge: implementation of STEM education methods in high school in conditions of full-scale invasion

The "STEM 51" project is implemented on the basis of Gymnasium No. 51 in Kryvyi Rih city, in a community with a high concentration of internally displaced persons. The project became the winner of the HALLI hackathon, which allowed the team to purchase the necessary sets for STEM education for high school students and to start project education methods.

The project leader became a co-author of the interdisciplinary course "STEMlab" for 7-9 grades, within which several integrated educational projects were developed.

PROJECT
SencyCry

Lviv region, Lviv city

Project field: IT solutions

Project challenge: prevention of aggression
by analyzing the noise level in the premises

The goal of the "SencyCry" project is the timely detection of aggressive behavior and signs of bullying using a device that responds to changes in the background noise (raised voices) in the premises. Thanks to the device developed as part of the project, it is possible to make the school environment safer and increase the speed of response to dangerous situations/signs of bullying.

The device is currently being tested in several educational institutions in the city of Lviv.

The team raised additional funds to improve system performance and its testing.

Active negotiations are ongoing with the city council regarding the installation of a large batch of devices in schools.

PROJECT

Digital learning center "DigitalTer

Ternopil region, Terebovlia city

Project field: digitalization

Project challenge: digital transformation of the community

**Digital learning
center "DigitalTer"**

The "DigitalTer" project contributes to the digitalization of the Terebovlia community.

The team has created a digital ecosystem that includes:

- Chat bot for the water utility;
- DRIVE - a series of digital literacy trainings;
- E-journal – implementation of electronic journals and diaries in community schools;
- "TerebovliaInfoBot" chat bot;
- A network of websites of educational institutions;
- Community portal;
- Digitized library.

PROJECT

EcoVtorSort

Cherkasy region, Cherkasy city

Project field: ecology

Project challenge: popularization of a careful attitude to the environment even in conditions of a full-scale invasion

The main goal of the "EcoVtorSort" project is to instill in children and youth a caring attitude towards ecology and promote a healthy lifestyle.

The project is a series of events in the community: trainings, workshops, explanatory lessons aimed at popularizing ways to solve environmental problems. Such joint activity, even in conditions of a full-scale invasion, unites the population around environmental protection activities, fostering the skills of environmentally friendly behavior.

PROJECT

Vzuttya dlya buttya

Kharkiv region, Kharkiv city

Project field: social entrepreneurship

Project challenge: teaching the profession of shoemaking to people who have lost their jobs or are in difficult life circumstances

The team set up a workshop for sewing shoes for people who found themselves in difficult life circumstances. Here you can not only get a new pair of shoes, but also learn the profession of a shoemaker and find a job in a new profession.

The project is being implemented in the front-line region, and despite extremely difficult conditions, it continues to operate.

PROJECT

Zrostaymo 1.0

Dnipropetrovsk region, Dnipro city

Project field: non-formal education

Project challenge: increasing the level of teenagers socialization

The " Zrostaymo 1.0" space is a unique platform for teenagers and their parents that offers a variety of activities. The program includes the development of emotional intelligence, leadership qualities, communication skills and the ability to resolve conflict situations. The activities of the space are focused on the socialization of children and youth, as well as on strengthening interaction with parents to improve understanding in families.

" Zrostaymo 1.0" helps teenagers to reveal their potential, discover their strengths and aptitude for certain professional fields. The program contributes to increasing the ability for further realization in life, identifying internal resources for building a successful career and forming an active civic position as a citizen of Ukraine.

PROJECT

Shevchenko in the cube

Poltava region, Poltava city

Project field: culture

Project challenge: rethinking the historical and cultural heritage of Poltava and Poltava region in the context of Ukraine and the world

The art weekend project "Shevchenko in the cube" was initiated by the NGO "Save Poltava region" and is aimed at revealing the figure of Kobzar with the latest optics. The goal of the project is to reveal the artistic versatility of Taras Shevchenko, to modernize the reading of his literary and artistic works, to create a space for communication and reflection about his contribution to local history and Ukrainian culture in general.

The festival consists of three parts: musical, lecture and theatrical. It will last for three days, from May 17 to 19, 2024, at three main locations: the courtyard of the Poltava regional history museum named after Vasyl Krychevskyi, Poltava agrarian academy and Poltava regional puppet theater.

PROJECT
**Center for free
communication**

Sumy Region, Okhtyrka city

Project field: non-formal education

Project challenge: assistance in co-creation of
local residents and IDPs

Center for free communication

The co-creation center was founded by activists of the NGO "Rise+". Due to the deterioration of the situation in the native village of Velyka Pysarivka, the organization relocated, but did not lose the need to build a capable and viable community. Therefore, the idea arose to establish a space for free communication in the host community, and in June 2024 it was opened in the city of Okhtyrka.

The center aims to support and develop the local community by providing a place for meetings, training and exchange of experiences. The center's activities are aimed at organizing various events to strengthen ties between residents, develop social and professional skills, as well as support initiatives that contribute to the improvement of community life.

HALLI 2.0 - Hackathon for Leadership in Local Innovations - an all-Ukrainian incubator for identifying, supporting and implementing innovations at the local level, implemented by the NGO "National Interest Advocacy Network "ANTS" with the financial support of NED.
